Load the dryer For best results it is recommended that the drying load be sorted by fabric type and desired dryness level. Also, close all zippers, hooks and eyelets and tie loose belts and apron strings, etc. Note If the load is not removed, the drum will, for the following 35 minutes, rotate at brief intervals to prevent wrinkling AntiCrease. After 35 minutes this fe. Bosch Appliances WTL 5400 page 9 CARE and CLEANING The housing and control panel should only be cleaned with a soft cloth rinsed in soapy water, or with a solvent free, nonscouring cleaning agent. Bosch Appliances WTL 5400 page 10 10 Moisture Sensor Occasionally the moisture sensors will need cleaning, due to a buildup of a fine layer of lime scale on the inside of the drum. This buildup of lime scale can be easily removed by wiping the sensors, the metal inserts in the paddles, and the inside of

the drum with a soft cloth soaked in vinegar use white vinegar. See Figure. <http://www.alexworkshopcenter.org/userfiles/7i43-manual.xml>

Bosch Appliances WTL 5400 page 11 SELFHELP Dryers may exhibit problems that are unrelated to a malfunction of the dryer itself. The following table may serve to answer your question about a problem you are having without having to call a serviceman. The Warranties provided herein are no. Your New Washing Machine. Care and Installation. Instructions. Beach, CA 92649. We look forward to hearing from you. About This Manual. A service technician to clean Please read this installation manual carefully before Remote controller holder. The Clear the area of objects such Parts Lists are. This manual has been prepared to instruct To order a new Operators or Parts Manual contact your Bed and table linen, Read all instructions before using the dryer. 2. Do not dry articles that have been previously cleaned in, washed in, soaked in, or spotted with gasoline, dry cleaning solvents, other flammable, or explosive substances as they give off vapors that could ignite or explode. 3. Do not allow children to play on or in the appliance. Close supervision of children is necessary when the appliance is used near children. 4. Before the appliance is removed from service or discarded, remove the door to the drying compartment. 5. Do not reach into the appliance if the drum is moving. 6. Do not install or store this appliance where it will be exposed to the weather. 7. Do not tamper with the controls. 8. Do not repair or replace any part of the appliance or attempt any service unless specifically recommended in the user maintenance instructions or in published user repair instructions that you understand and have the skills to carry out. 9. Do not use fabric softeners or products to eliminate static unless recommended by the manufacturer of the fabric softener or product. 10. Do not use heat to dry articles containing foam rubber may be labeled latex foam or similarly textured rubberlike materials.

Foam rubber materials can, under certain circumstances, when heated become ignited by spontaneous combustion. 11. Clean lint screen before or after each load. 12. Keep area around the exhaust opening and adjacent surrounding areas free from the accumulation of lint, dust and dirt. 13. The interior of the machine and exhaust duct should be cleaned periodically by qualified service personnel. 14. Always be sure to unplug the dryer from the electrical supply before attempting any service. Disconnect the power cord by grasping the plug, not the cord. 15. Store all laundry chemicals and aids in a cool dry place according to the manufacturer's instructions in an area where children cannot reach them. 16. To reduce the risk of fire, clothes, cleaning rags, mop heads and the like which have traces of any flammable substance, such as vegetable oil, cooking oil, petroleum based oils or distillates. These items may contain some flammable substances even after washing, which may smoke or catch fire by itself. 17. Do not sit on top of the dryer. 18. To reduce the risk of fire or electrical shock, DO NOT use an extension cord or an adapter to connect the dryer to the electrical power supply. 2 IMPORTANT SAFETY INSTRUCTIONS continued 19. The dryer must only be used for its intended purpose. 20. Always check and empty pockets of any objects that may have been forgotten. Common sense, caution and care must be exercised when installing, maintaining or operating the dryer. B. Always contact your dealer, distributor, service agent or the manufacturer about any problems or conditions that you do not understand. SAVE THESE INSTRUCTIONS GROUNDING INSTRUCTIONS This appliance must be grounded. In the event of malfunction or breakdown, grounding will reduce the risk of electric shock by providing a path of least resistance for the electric current. This appliance is equipped with a cord having an equipment grounding conductor and a grounding plug.

The plug must be plugged into an appropriate outlet that is properly installed and grounded in accordance with all local codes and ordinances. WARNING Improper connection of the equipment grounding conductor can result in a risk of electric shock. Check with a qualified electrician or serviceman if you are in doubt as to whether the washer is properly grounded. Time Cycles Selector Knob 11. Auto Cycles Selector knob 12. Indicator lights for program selected 13.

Indicator lights for time program selected 14. BEFORE USING FOR THE FIRST TIME Before beginning to use your dryer for the first time 1. Check to make sure that the voltage on which the dryer is to operate is the same as shown on the rating plate. GETTING STARTED Below, in order to get started, you will find a summary of how to operate the clothes dryer. The lint filter, located in the door, should be cleaned after or before each load. Check the lint filter and if it was not cleaned after last use clean it now. Damp Dry Econo Dry Light Dry Regular Dry Very Dry Extra Dry Permanent Press Econo Dry Light Dry Regular Dry Very Dry Extra Dry Heated Dry 1090 min. Air Fluff 1090 min. 3. Load the dryer For best results it is recommended that the drying load be sorted by fabric type and desired dryness level. Also, close all zippers, hooks and eyelets and tie loose belts and apron strings, etc. The door will open and the drum light will turn on. b. Check the drum interior for foreign objects or pets and remove any used fabric softener sheets. c. Place laundry items to be dried loosely into the drum of the dryer. 4. Add Fabric Softener Sheet, if desired If a fabric softener sheet is to be added it should be done after loading the dryer and before the dryer and load become warm. This will prevent greasy-looking softener stains. Timed Cycles 09 0 0 Air Fluff b. To use Time Cycles dryer runs for selected length of time activate by turning the time program selector see Figure 4 i.

Heated Dry The Time Cycles knob should be turned to point to the right to select the Heated Dry setting. The time can be set at 10 90 minutes in 10 minute steps. As the knob is turned the lights directly above the knob will illuminate to indicate the level of dryness selected. See Table 1 for recommended settings for type of load being dried. See Table 1 for recommended settings for type of load being dried. Air Fluff cold The Time Cycles knob should be turned to point the left to select the Air Fluff setting. The time can be set at 10 90 minutes in 10 minute steps. Note The AutoProgram knob must be pointing straight up to use Time Cycles. Learn how we and our ad partner Google, collect and use data. Mine showed lights as if working when closed but I decided to use a screwdriver and push in switch all the way in. It worked then without door closed. It will stay stuck until you pull it own a bit to release it. Give it a try. The door switch appears to have two switches in it requiring it to be all the way in. Try using a different program. I tried to clean the dial but it didnt help. The most common causes are the belt breaking or jumping off, or the motor going bad. Here are a couple of tips that I wrote will help you to figure out why your dryer will not run. Dryer Repair The Dryer is not Turning Dryer Repair The dryer will not start heatman101 If you are having problems with your gas dryer not heating the most common problem is that the ignitor goes bad. Even though it glows sometimes it is still not working properly. If you have an electric dryer, you can have many different things that can go wrong causing the dryer not to heat. This tip that I wrote will help you to figure out what is happening. Dryer Repair The Dryer is not Turning Dryer Repair. The dryer will not start heatman101 Answer questions, earn points and help others. All the power lights are on and such it just wont start. Anything i can look for before calling for help I have a WTL.

No heat is coming into the drum. All filters were cleaned thoroughly. Is there anything I can do to attempt to. I found that the dryer will not start because the door isnt fully. Can someone show me how to open there and clean the filter, please Thank you. Dont know how. Se solution at Hi, If you are having problems with your gas dryer not heating the most common problem is that the ignitor goes bad. Even though it. When I went to start a new load, it would not start. All of the lights were working fine, in fact when I pressed start, the drying light went on, but the. Can this be done, and if so what parts do I need. Answer questions, earn points and help others. Six programmable isolated digital inputs Two scaleable analog inputs 0 V to 10 V. Bosch wtl 5500 manual, Jaksa roder manual I would purchase the heavier duty item if you have a lot to do. It works fine for seasonal and smaller jobs. September 21, 2015. Rated 4.0 out of 5.0 by Teddybeartech Done the job I got the stapler to put a new cover on a chair and staple the fabric to the chair. The undervoltage stage features definite time characteristic alone. An external control signal can be used to block the operation of the undervoltage stage. The relay forms a whole including over and undervoltage stage as well as

flexible trip and alarm functions. The emotional climate and participants expectations of the interaction will also affect the communication. manuals and Bosch WTA 3500 Users Manual. Presonus Audio electronic. This is a straightforward but quite detailed diagram of what each region of the brain does. If you consider it, this is actually the first thing that comes to mind if we are attempting to comprehend complicated brain function. And you'd think that the left side are the logic behind the brain and the right side would be the logic of the human body. But if you understood that either side function in harmony and send info back and forth then maybe you could come to your own decisions. The fact is that there is no external intelligence which makes up our mind and there is no extracorporeal mind which makes up our body. We're all connected and that makes it feasible for us to function in an even keel and do things which make sense.

These different regions of the brain which are identified by different letters which compose the diagram in the right hand column are what make up every portion of the mind. In addition to this inner sense of touch, which the words auditory visual give you, there's the other sense of touch. When a finger is stored close to the eyes or a thumb is placed on the ear, that sense is called tactile. Then there are the flavor and odor, which the letters flavorsmell provide. Along with these, there's also a sixth feel known as jelqing, which can be more used in childhood than anything else. This sense of touch joins to our bodies throughout the arms and legs and the voice and face. It supplies us with a degree of memory from remote ancestors of exactly what each of those limbs was through in the past. A more specific explanation of what each of those senses is can be seen in the diagram in the ideal hand column of this guide, but even though we know what every one of those senses is and how they work together, it is very important to realize that their character and role are a mystery. But a very clear picture of what each of those areas of the brain do helps us find our way on earth. For example, the experience of hearing might be based on the upper half of the diagram and the expertise of viewing on the bottom half of this diagram. These aspects of the sensation of touch are the final aspect of the brain which most people are conscious of. But for those who have had direct experience of the sense of touch, the lines that make up the diagram in the lower right hand corner and the higher part of the diagram inform us that we are not simply hearing externally, but are also smelling and seeing too. By understanding the layers of the mind, we could better control the flow of information that is delivered and received from different areas of the mind and how we use this data in our everyday lives.
